

RESUMÉ: Nick Steytler

Nick Steytler is an environmental scientist (Pr Sci Nat) with over 20 years' experience as a professional in the field of environmental management. He was initially employed in KwaZulu-Natal (KZN) as part of the Institute of Natural Resources' (INR) Natural Resource Management Programme where his work focussed on the sustainable use of natural resources in rural KZN. While at the INR he worked within the water resources management sector and specifically in the field of Integrated Catchment Management. He then moved to the Western Cape where he was employed by SRK Consulting as an environmental consultant. He remained with SRK for 5 years during which time he provided consulting services to clients in both the public and private sectors and not only in South Africa but also in Mozambique and Angola. The majority of his work was in the field of Integrated Environmental Management (i.e. undertaking EIAs and the like) but he has also continued to maintain an interest in water resources management. In 2007 Nick established KHULA Environmental Consultants which has developed a reputation in the Western Cape for providing clients with a high-quality service at affordable rates for consulting services in both the fields of Integrated Environmental Management (e.g. EIAs, EMPs, environmental audits and ECO services) and Natural Resource Management (wetland and riparian systems management, coastal management and Event and Facility Greening). KHULA has a strong coastal focus, undertaking many of its projects in the coastal areas from the West Coast through to the Eastern Cape coast.
